DETAILED ACTION

Status of the Application

Claims 1-15 are pending in the application.

Applicants' amendment to claims 5 and 7 and addition of claims 10-15 in a preliminary amendment filed as Paper No. 8 is acknowledged.

Lack of Unity

1. Lack of unity is required under 35 U.S.C. 121 and 372. This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

I. Claim(s) 1 and 9, drawn to a recombinant endo-beta-N-acetylglucosaminidase and a method of production thereof.

II. Claim(s) 2-8 and 10-15, drawn to a gene encoding an endo-beta-N-acetylglucosaminidase, a vector, and a transformant.

2. The technical feature linking Groups I and II appears to be that they all relate to an endo-beta-N-glucosaminidase gene.

3. The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical feature for the following reasons: The polypeptide of Group I and the polynucleotide of Group II are unrelated and chemically distinct entities. Also, endo-beta-N-acetylglucosaminidase polypeptides and polynucleotides encoding therefor are known in the prior art. For example, Takegawa et al. (Arch Biochem Biophys 338:22-28, abstract) discloses cloning of a gene encoding an *Arthrobacter protophormiae* endo-beta-N-acetylglucosaminidase and expression of the gene in *E. coli* for production of the encoded polypeptide. Thus, Groups I and II share no special technical feature as defined by PCT Rule 13.2.

Art Unit: 1652

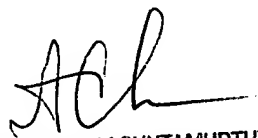

4. Each of the inventions listed as Groups I and II requires a separate patent and non-patent literature and sequence search. Because these inventions are distinct for the reasons given above and each of the inventions listed as Groups I and II requires a separate search, restriction for examination purposes as indicated is proper. "For purposes of the initial requirement, a serious burden on the examiner may be *prima facie* shown if the examiner shows by appropriate explanation either separate classification, separate status in the art, or a different field of search as defined in MPEP 808.02" (see MPEP 803).

5. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
